Long-life Table and Deflector Nonwoven Rolls

Nonwoven strength and durability at a urethane price point

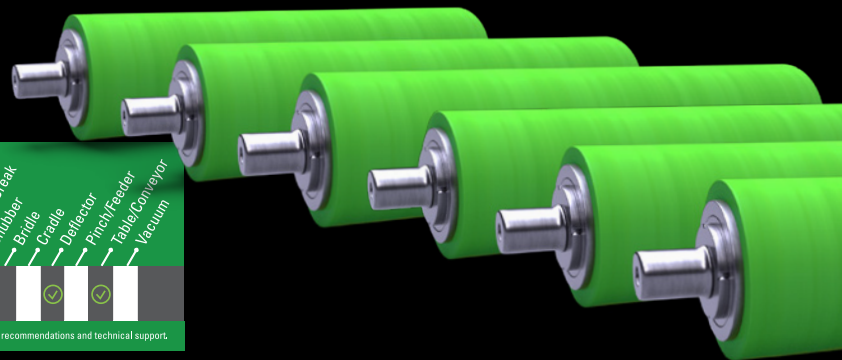

NCCM® RU

Long-life Table and Deflector Nonwoven Rolls

NCCM® RU nonwoven rolls are newly patented and have been specifically developed to replace the majority of conventional and less demanding rubber and urethane rolls in multiple table, deflector and conveyor applications. **NCCM® RU** nonwoven rolls are a high-value proposition due to their outstanding durability and other unique nonwoven product features at a competitive urethane price point. **NCCM® RU** brings classic NCCM benefits to the table, such as long life, cut resistance and non-marking qualities. In addition, the **NCCM® RU** has reduced noise on push/pull lines by up to 10 decibels compared to urethane rolls. Best of all, **NCCM® RU** is sold at a similar price point to urethane and can last up to **5x longer** than rubber or urethane. That's new and revolutionary for the roll industry!

NCCM Company also has the capacity to manufacture shafts and mechanical components in-house to give customers the highest value-add possible.

TECHNICAL INFORMATION:

NCCM R-SERIES PRODUCT

NCCM® RU

Long-Life Nonwoven Table and Bridle Rolls
Nonwoven strength and durability at a urethane price point

Highly economic, competitive and long-lasting **REPLACEMENT** for any heavy-wear **RUBBER AND URETHANE** rolls

This chart is meant to give an overview and does not provide formal guarantees for any application. Please contact an NCCM representative for further recommendations and technical support.

NCCM® RU	DENSITY RU single density	WALL THICKNESS approx. 12,7mm (0.5") approx. 19,1mm (0.75")
	OUTSIDE DIAMETER RANGE approx. 101,6–1.219,2mm (4–48")	MAX. FACE WIDTH approx. 2.844,8mm (112")
	OPERATIONAL pH Range 2–10	MAX. TEMPERATURE approx. 90°C (194°F)

All application parameters are relative to specific applications and do not provide formal guarantees. Please contact an NCCM representative for further insight and questions on sizes, parameters and requirements.

NCCM® RU	FEATURES	BENEFITS
	<ul style="list-style-type: none"> • Long life* • Chunk out resistant • High coefficient of friction • Cut resistant • Porosity 	<ul style="list-style-type: none"> • Reduced marking • Reduced contact noise** • Increased grip on products • Reduced replacement cost • Reduced inventory cost • Reduced maintenance cost • Cost effective***

*up to 5x longer than urethane
**up to 10dB reduction
***Please contact an NCCM representative for additional information on features and benefits.

NCCM® RU Nonwoven Rolls Can Last Up to 5x Longer than Rubber or Urethane!
